Limit on additions to defined contribution plan	\$54,000
Annual benefit limit on defined benefit plan	\$215,000
Highly compensated employee makes	\$120,000
Annual compensation taken into account for qualified plans	\$270,000

The U.S. Internal Revenue Service has made annual inflation adjustments affecting many tax provisions, including tax rate schedules, that affect income earned in 2016 and tax returns filed in early 2017. The front page of this flyer provides specifics on many of these changes, and some of the key changes are also highlighted below.

Noteworthy changes in tax provisions for the 2017 tax year*

Adjusted Tax Bracket Thresholds

The income level at which married taxpayers filing joint returns are subject to the highest bracket of 39.6% increases from \$466,950 in 2016 to \$470,700 in 2017. Single taxpayers are subject to the 39.6% tax rate on income over \$418,400, increased from \$415,050 in 2016.

Increases in Standard Deductions

The standard deduction for married taxpayers filing joint returns increased slightly to \$12,700, \$100 more than in 2015 and 2016. It also increases slightly for single taxpayers and married taxpayers filing separately to \$6,350. The standard deduction increases for heads of household, from \$9,300 to \$9,350.

Provisions Made Permanent

Since 2009 taxpayers have been allowed a \$2,500 credit for up to four years of post-secondary education expenses subject to certain phase-outs. Starting in 2017, however, the credit was set to revert to a maximum of \$1,800 with lower phase-out thresholds. The tax extender bill makes this credit permanent at the \$2,500 level.

Estate Tax Exemption Rises

Estates of decedents who die during 2017 have a basic exemption amount of \$5,490,000 up from a total of \$5,450,000 for estates of decedents who died in 2016.

Required Minimum Distributions

The Uniform Lifetime Table can be used by all IRA owners, at age 70 years, unless their sole beneficiary for the entire year is a spouse who is more than 10 years younger. Then the regular Joint Life Expectancy Table is used (see IRS Pub. 590), which could reduce the required minimum distribution even further.

Uniform Lifetime Table

Age of account owner	Divisor	Age of account owner	Divisor
70	27.4	81	17.9
71	26.5	82	17.1
72	25.6	83	16.3
73	24.7	84	15.5
74	23.8	85	14.8
75	22.9	86	14.1
76	22.0	87	13.4
77	21.2	88	12.7
78	20.3	89	12.0
79	19.5	90	11.4
80	18.7
